

VMC Water Flow — Daily Analysis Report

Benchmark: last calendar month | Report day: most recent complete day | Generated: 06 Aug 2026 03:07 IST

■ No tags returned usable data for this report

None of the configured tag **objectname** values matched a real tag in the VMC API's response. This means the TAGS list in the worker script is using placeholder identifiers rather than the API's actual tag names.

Check **vmc_worker.log** for lines starting with **"objectname '...' not found in response"** — each one lists a sample of the real tag names the API returned (e.g. AIB_FT015, NMT_FT007). Match each of the 8 configured tags to its correct real name and update the TAGS list in the script, then re-run.

Per-tag status

Tag	Error
RTU-4910-A	No data returned from API
RTU-4910-B	No data returned from API
RTU-4910-D	No data returned from API
DLP-4954-A	No data returned from API
DLP-4962-B	No data returned from API
RTU-6294-A	No data returned from API
RTU-6429-A	No data returned from API
RTU-4909-A	No data returned from API
